

CQC Group Environmental Policy 2026

CQC Group is a professional and environmentally conscious organisation that acknowledges the potential impact our operations may have on the environment. Our clear objective is to minimize any environmental impact by:

- **Preventing Pollution:** Implementing measures to prevent pollution, reduce waste, and ensure the protection and preservation of natural habitats whenever practicable.
- **Stakeholder Consideration:** Consider the effects of our operations on stakeholders, including employees, customers, suppliers, and the community.
- **Reducing Adverse Impacts:** Taking proactive steps to eliminate or reduce the likelihood of any potentially adverse environmental impacts.
- **Promoting Environmental Awareness:** Engaging with suppliers, contractors, and partners to promote environmental awareness and implement sustainable operational procedures.
- **Incident Management:** Ensuring effective and expedient incident control, investigation, and reporting.

Directors have an overall responsibility for environmental matters. The operation of this policy and associated procedures will be monitored and reviewed regularly to ensure they remain current and applicable to our activities.

CQC Group will fully comply with all applicable environmental legislation and, as a matter of best practice, adhere to the requirements and guidance issued by the Environment Agency and other relevant organizations. As part of our commitment to maintain the highest levels of environmental management in compliance with ISO 14001:2015 and aim for net zero compliance by 2045 in line with government and NHS guidelines.

CQC will take all practical steps to identify potential hazards and risks to the environment and implement suitable and effective preventive and control measures. All employees and sub-contractors will be provided with the necessary resources, equipment, information, instruction, and training to fulfill the requirements of this policy.

CQC Group operates a system that regularly evaluates processes and customer needs, setting up quantifiable objectives and plans for continual improvement. We are committed to continually improving the effectiveness of our environmental management systems, preventing pollution within the working environment, and protecting the wider external environment.

Samantha Moulding
Managing Director CQC Group
